Abstract. The Anti-Dumping (AD) mechanism is susceptible to potential misuse for protectionist purposes, and the current explosion of AD disputes indicate a massive problem in the way international trade rules are implemented. The current World Trade Organisation (WTO) negotiations have identified areas within the Anti-Dumping Agreement (ADA) for possible reform; accordingly, the present analysis discusses these areas of concern relating to the AD provision.

If a company exports a product at a price lower than the price it normally charges on its own home market, it is said to be "dumping" the product. The WTO Agreement does not regulate the actions of companies engaged in "dumping". Its focus is on how governments can or cannot react to dumping — it disciplines anti-dumping actions, and it is often called the "Anti-dumping Agreement".

Anti-dumping duties or tariffs remove the main advantage of dumping. A country can add an extra duty, or tax, on imports of goods that it considers to be involved in dumping. If that country is a member of the WTO or EU, it must prove that dumping existed before slapping on the duties.

### Trade Dumping: Definition, Pros, Cons, Anti-dumping

Anti-dumping measures can only be applied if the dumping is hurting the industry in the importing country. Therefore, a detailed investigation has to be conducted according to specified rules first. The investigation must evaluate all relevant economic factors that have a bearing on the state of the industry in question.
