The Chrysler 3.5-liter engine is used in a number of vehicles, including the Chrysler Concorde and New Yorker. The newer engines have up to 255 horsepower. Most companies will sell upgraded parts by the model of vehicle first, then the type of engine. Ways to improve the performance of the engine include using iridium ...

### **Upgrades for a Chrysler 3.5L | It Still Runs**

I have a 1997 Chrysler Concorde with a V 3.5 liter engine. Just died, and the mechanic says it is more severe than just the timing belt. He says it is an "interference" engine. My research shows a "non interference" engine. Could be a huge difference in repair costs as it may have damaged other internal parts. Can you give me a definitive answer?

Chrysler's 3.2 liter V-6 engine was a new design, using aluminum blocks and heads, based on the original 3.5 liter V6; it was discontinued in 2002 to simplify the engine lineup. The 3.5 litre V6 engine was, at the same time, modified and switched to an aluminum block, to produce between 242 and 253 hp; a re-engineered 3.8 liter engine, related to both, was released later.
