Environmental Preservation And Conservation In

Conservation & Preservation. The two terms conservation and preservation are often confused and are used to mean the same thing, although differences exist. Conservationists include those who accept that change and progression are necessary for a better future, but only when the changes take place in ways that are not wasteful. What the conservationist opposes is not the harnessing of nature for mankind's progression per se, but the fact that all too often the impacts on the environment ...

Conservation & Preservation | Sustainable Environment Online

The modern environmental movement, which became a powerful force in the 1960s, built on the earlier efforts to conserve natural resources, preserve wilderness, and control pollution. But the environmental movement also was a response to profound

New York State Department of Environmental Conservation

Conservation typically refers to attempts to make humans' relationship with the environment sustainable while still extracting natural resources. Conservationists usually support measures that reduce human use of natural resources, but only when such measures benefit humans.

Conservation or Preservation: Which Is Best?

Conservation is similar to preservation, but while both relate to the protection of nature, they strive to accomplish this task in different ways. Conservation seeks the sustainable use of nature by humans, for activities such as hunting, logging, or mining, while preservation means protecting nature from human use.

Conservation | National Geographic Society

The words “ preservation ” and “ conservation ” are often used interchangeably, but the two concepts are quite different. Conservation protects the environment through the responsible use of natural resources. Preservation protects the environment from harmful human activities. For example, conserving a forest typically involves sustainable logging practices to minimize deforestation.

Preservation | National Geographic Society

Conservation is not preservation, however, and the two are often mixed (3). The key difference according to the US National Park Service is that conservation ethics seeks the “proper use” of natural resources while preservation seeks to protect nature against any kind of use.

Conservation: History and Future - Environmental Science

While both conservation and preservation work to protect and sustain the earth, their role is essentially different. And while the two can work together, they have a distinct part to play in environmental management and protection. In many places, it would be near impossible to try and preserve a resource like water, or a food source.
