Factor Polynomials - Understand In 10 min - YouTube

A Polynomial can be expressed in terms that only have positive integer exponents and the operations of addition, subtraction, and multiplication. In other words, it must be possible to

Online Library Polynomial Answers

write the expression without division. It's easiest to understand what makes something a polynomial equation by looking at examples and non examples as shown below.

Polynomial Equation. Examples, non examples and difference ...

Also, polynomials of one variable are

Online Library Polynomial Answers

easy to graph, as they have smooth and continuous lines. Example: $x^4 - 2x^2 + x$. See how nice and smooth the curve is? You can also divide polynomials (but the result may not be a polynomial).
Degree. The degree of a polynomial with only one variable is the largest exponent of that variable.
