We examined whether a past history of maternal depression affects the manner in which mothers speak to their children, and whether any differences relate to child language development. To do this, we measured acoustic, temporal and content-based speech/language characteristics of 40 pre-school-aged children and mothers with and without a history of depression.

Maternal hospitalization, except when associated with delivery, can serve as a marker for severe maternal morbidity. For example, during 1987-1988, a study of pregnancy-related hospitalizations indicated the ratio for black women was 1.4 times that for white women (6); during the same period, the black-white maternal mortality ratio was 3.1.
